Underwater Climbing Machine System,
Electric Drive with Remote Water Pump*
International Climbing Machines, Inc.

ICM Underwater Climbers can be deployed in tanks, vessels, on ship hulls or other structures. They are held to the surface with water flow through the Climber. The systems are small and portable and can be set up very quickly for easy deployment and maximum versatility. An endless array of tools/capabilities can be attached to an **ICM** Underwater Climber such as:

- NDT Instruments
- Cameras
- Drilling/Mechanical Tools
- Cleaning Brushes
- Underwater Coating Application Tools
- Your Technology

* On-Board or Remote Pump Systems Available
